### Skeletons Puzzle Evolutionists

*For [in] six days the LORD made heaven and earth, the sea, and all that in them [is], and rested the seventh day: – Exodus 20:11a*

Contrary to what the theory of evolution says, the history of life found in the fossil record does not show simpler kinds of living things gradually becoming more complex. Life appears suddenly in the fossil record. And the living things found in the earliest rocks are completely developed and well equipped for life.

According to evolution, one of the greatest steps forward by living things was the development of skeletons. The first evolutionary step toward skeletons started with the development of calcium shells by marine creatures. Yet, the fossil record shows that creatures with calcium shells simply appear fully formed, as do creatures with internal skeletons. One question that troubles evolutionists is why creatures suddenly decided they needed skeletons.

Of course, the sudden appearance of fully formed, well-equipped life agrees nicely with the Bible's claim that all life was created fully formed by God. When the evidence from science agrees so well with the Bible, those who insist on evolution do so only by faith – a faith that is against the Bible.

**Prayer:** Dear Lord, in their pride, people rage against Your truth. Use me as Your instrument to make the testimony of Your truth more clearly heard so that fewer are lost to a false faith. Amen.
